Hi Mark,

I hope you're doing well.

I have spoken to Lorena and we have a few light post area's that are down.

I think it is best if we meet on Wednesday to go over the area's. The map that is attached is the current map where we have lights hung.

On Wednesday we can meet & walk through the map route to see what needs maintenance.

Feel free to reach out with any questions or concerns.

See you Wednesday.

Hello Francis,

Thank you for taking my call today and I hope you had a nice New Years!

I am working on starting a quote to repair the overhead lighting. Below is the email trail I received regarding your program. Can you send me the site map that Mario is

referring to? I have attached the site map that we have on file for reference and want to make sure we are talking about the same thing.

I will be in your area next Wednesday and am free 10am to 12pm if you would like to meet.

Respectfully,

Mark Sickler

Importance: High

Lorena,

Yes we are just about done with the Holidays

You will have a new contact starting in 2018 . His name is Mark Sickler and he has been with Dekra-Lite over 6 years now and will be taking over the San Pedro area for lighting and the Holiday program moving forward. I will be at Dekra-Lite but in a remote location working in a different capacity.

Respectfully,

George Livermore

George,

After the Christmas rush, I need a thorough evaluation of the tivoli lights. More strands are not working. Plus, we still haven't addressed Mario's question.

When will you have time to do this evaluation? It's getting worse out here. It's not just 5th Street.

Kind regards,

Lorena Parker

George,

Every single pole is a green box in this map. You are even including sections that were not permitted because they are on an existing high voltage circuit. How is that possible?

On Thu, May 18, 2017 at 8:30 AM, George Livermore <GeorgeL@dekra-lite.com> wrote:

Mario

We have a TAPA unit at each pole where the green box is indicated on this site plan.

Hi Lorena/George,

No, this is not what I need. I need only the poles where you had connected to the electrical power with your adapter unit.

Thanks,

Hi Lorena,

As mentioned in my last email and our phone conversation, you need to provide the specific location(s) of the pole(s) where Dekralite made the connection to power up your decorative (tivoli) lights. I need that information to initiate a request to make a modification to the poles where your lights are connected.

Regards,

Mario,

Per your request, attached is a map of where our lights are located.

I have a meeting with my Executive Committee next week. Do you think you will know the course of action by then so I can report back to them?

We look forward to getting our lights turned back on on 5th Street.

Thank you.

Hi Lorena,

These Remote Monitoring Devices were indeed installed by our crews as part of a pilot program. The new devices are not compatible with your adapter and there was no way for our crews to reconnect your lights. We are working on a solution to be able to keep the new monitoring device in place and your lights powered up. Please provide the exact location(s) of the pole(s) where Dekralite made the connection to power up your tivoli lights and our crews disconnected.

Regards,

Subject: Request to evaluate the Tivoli Lights on Centre St.

George,

Last week, I was on the intersection of 5th Street and Centre Street and I noticed one of the strands dangling. It is located between 5th St. and 3rd St.

Can you please send a crew out there to assess the situation. When I previously made my request, I requested that your crew go to Centre St. between 5th and 6th Streets.

I checked with LADWP and they said that they haven't changed anything out. If your crew goes up there, it would be helpful to me if they can take some photods of the issue. I'm still trying to resolve this.

Thank you for your assistance.
